

It's not just a place where you get to learn, Einstein's theory of relativity. It's also a place where you can miss to spend the time. Hence we say, SCHOOL IS COOL!

BHS showcases concern for East Kolkata Wetlands

PAINTERS GALLERY

Sent in by a student

Birla High School students of classes VI to X got up an art and craft show with their concern for the Biodiversity of East Kolkata Wetlands on July 27. The exhibition included poster paintings, nature study, jingles and wildlife photography, displaying the beauty and greenery of the East Kolkata Wetlands (EKW) in all its glory. A quiz and a memory game on the smart board were also a part of the show as a mark of respect to Dr Dhrubajyoti Ghosh, the father-saviour of the East Kolkata Wetlands, who took EKW to global conferences as a unique ecosystem. This special function was attended by Lovleen Saigal, principal of Birla High School. The young learners' keen interest in the flora and fauna of East Kolkata Wetlands delighted the principal and the other guests who were invited to the event.
